New Humanity involves people engaged to give “a soul” to modern society, helping each other to introduce reciprocity inside daily and professional lives, bringing hope and trust into economical bodies.

Barcelona Management Group meets every 2 month to share ideas and experiences on personal engagement in management responsibility, as a privilege space to build a network of sharing for the common good.

They open their “reciprocity laboratory” to other managers, to share the beauty of thinking and working for a common project, facing great questions regarding economics and management.
